

PUBLIC NOTICE: AVAILABILITY OF 303(d) LIST

Tennessee Department of Environment and Conservation
Division of Water Pollution Control
6th Floor, L & C Annex
401 Church Street
Nashville, Tennessee 37243-1534

The Tennessee Department of Environment and Conservation, Division of Water Pollution Control, has issued a draft version of the 303(d) List as required by the federal Clean Water Act as amended in 1987. The prioritized list provides information on the surface waters not fully supporting designated uses due to the violation of narrative and/or numeric water quality standards.

The 303(d) List identifies waters suitable for total maximum daily load (TMDL) and thermal load calculations. TMDLs are developed to define the levels of pollution control that would be needed for protection of public health, aquatic life, and recreation. The priority ranking reflects the uses to be made of such waters, the severity of pollution, and the feasibility of control strategies.

The contents and prioritization of the 303(d) List are subject to review by the public. The 303(d) List may be downloaded from the Department's home page at: www.state.tn.us/environment.

Several public meetings have been scheduled throughout the state concerning this matter and are listed on the following page. This schedule will also be posted on the TDEC website. For further information, contact Gregory.denton@state.tn.us or write to the above address. All written comments must be received by August 3, 2004.

2004 303(d) List Public Meeting Schedule

Town names are linked to maps

WATERSHED	DATE	LOCATION	LOCAL TIME
Jackson	June 28, 2004	Main Auditorium TDOT Region IV Office 300 Benchmark Place, Jackson	2:00 pm
